

pop in
sliding door

worldwide unique
sliding door system.

simply glass.

flush and **frameless**.

an easy game.

safe.
fully tested.
totally reliable.

simply glass.

The Pop-In sliding door system creates a sophisticated ambiance and clarity so that all you see is glass.

The frame, its operational mechanism or brackets do not disturb the transparent assembly. As a single flowing glass wall, the entire facade is finished inside and out flush with the adjacent areas.

A revolutionary innovation of transparency, technology and design.

flush and frameless.

The revolutionary Pop-In sliding door literally opens to a new world of glass architecture.

Whether open to the outside world or locked securely, there is no disturbance to the frameless appearance. The smooth transition between its open and closed position leads to a harmonic fusion of the entire glass facade. The seals and locks are subtlety concealed between the high performance glass plates and a narrow screen printed edge. This can be to the specifiers own choice.

This is glass architecture and engineering at its very best.

an easy game.

The Pop-In sliding door glides effortlessly despite its weight and robust design.

It glides into position on invisible runners in the ceiling. Discrete floor guides float the doors into their desired position. The multiple-point locking system quietly secures the doors from intrusion by wind, water and the un-invited visitor!

This globally unique system makes child's play of the motion sequence without competition.

safe. fully tested. totally reliable.

Storm-tested and waterproof.

The system has undergone severe and comprehensive weather testing, greater than required in both Europe and the UK. From residential housing to skyscraper installations, it has with much bravado, proven its pedigree with more than one thousand installed units worldwide.

Safety in its most wonderful form.
